

Class Procedures

Updated June 2020 - COVID-19 RESPONSE

Every Child, Parent, & Instructor's health and safety are top priority at Miss Maria's. Procedures are subject to change any time and must be followed during every class.

Student & Instructor behavior:

Any student or instructor attending class must not have a fever or show any signs of sickness along with any family members for 2 weeks prior to attending class.

All students/instructors must wash hands at home before class or use hand sanitizer

All students must have hair securely tied back so has to not touch hands to face.

All students must bring a full water bottle to class and bring into classroom.

Nothing except a water bottle and dance shoes should be brought into building.

Instructors and students may wear a face mask, but are not required to do so.

Make sure young students' dance shoes are tied in knots so as to not come untied.

Please make sure your child used the restroom at home right before leaving for MM.

Classes:

All dance classes will have markings on the floor 6 feet apart for students. Clearly it will be difficult to keep all students 6 feet from one another for the entire class, but instructors will try their best to keep students from touching one another and keep them spaced apart as much as possible.

Entrance and Exit from Studio:

Students may now enter and exit their class through the lobby. We ask that parents and students social distance as much as possible while in the lobby waiting for class.

You may also wait outside until your class starts. We encourage parents to wear masks and social distance while in the lobby.

Lobby Seating:

We ask that parents not congregate in the Lobby. Seating is spaced 6 feet apart.

Parents of very young students may stay in lobby, however we ask only 1 parent stay.

We ask that all other parents and siblings wait outside or in their car or leave and return on time at the end of class. Older students may be dropped off at front door.

Reduced Class Size:

Classes will be limited depending on the size of the room to allow for social distancing.

Disinfecting Studio:

Tumbling equipment, door handles and other surfaces will be disinfected each day. All doors will remain open when at all possible to cut down on multiple hands touching handles.

Contact tracing: If any student or family member that has been attending class or inside the studio gets sick or develops a fever, or tests positive for Covid 19, please contact Miss Maria's ASAP.
